Prof. Joshua Lederberg, Ph.D.
University of Wisconsin
Dept. of Genetics
Medison 6, Wisc.

Dear Dr. Lederberg:

Reading Dr. Kauffmann's works, I have
learned about the encouraging results you have got on
the transduction of serological properties in the Sal-
monella group.

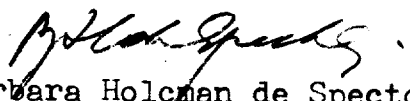

~~1-2-58~~
TM2
I am working on the transduction of
H i antigen of S. typhimurium to S. enteritidis. I have
used almost 20 strains of S. typhimurium in order to get
the phago with no success.

I wonder if you would be so kind as
to send me one or more small samples of the bacteria
phago producers.

I would also appreciate to receive
your papers on the matter, if available.

Thank you very much in advance for
your attention to my request

your sincerely

Barbara Holman de Spector
